

# Towards A Framework of Internet of Things (IoT) In Smart Buildings: A Bibliometric Approach

DR BRUNO LOT TANKO, MRICS, MNIQS, RQS, FHEA

**PAQSS**  
**CONGRESS**

SINGAPORE 2022

9 TO 13 SEPTEMBER 2022

MARINA BAY SANDS SINGAPORE

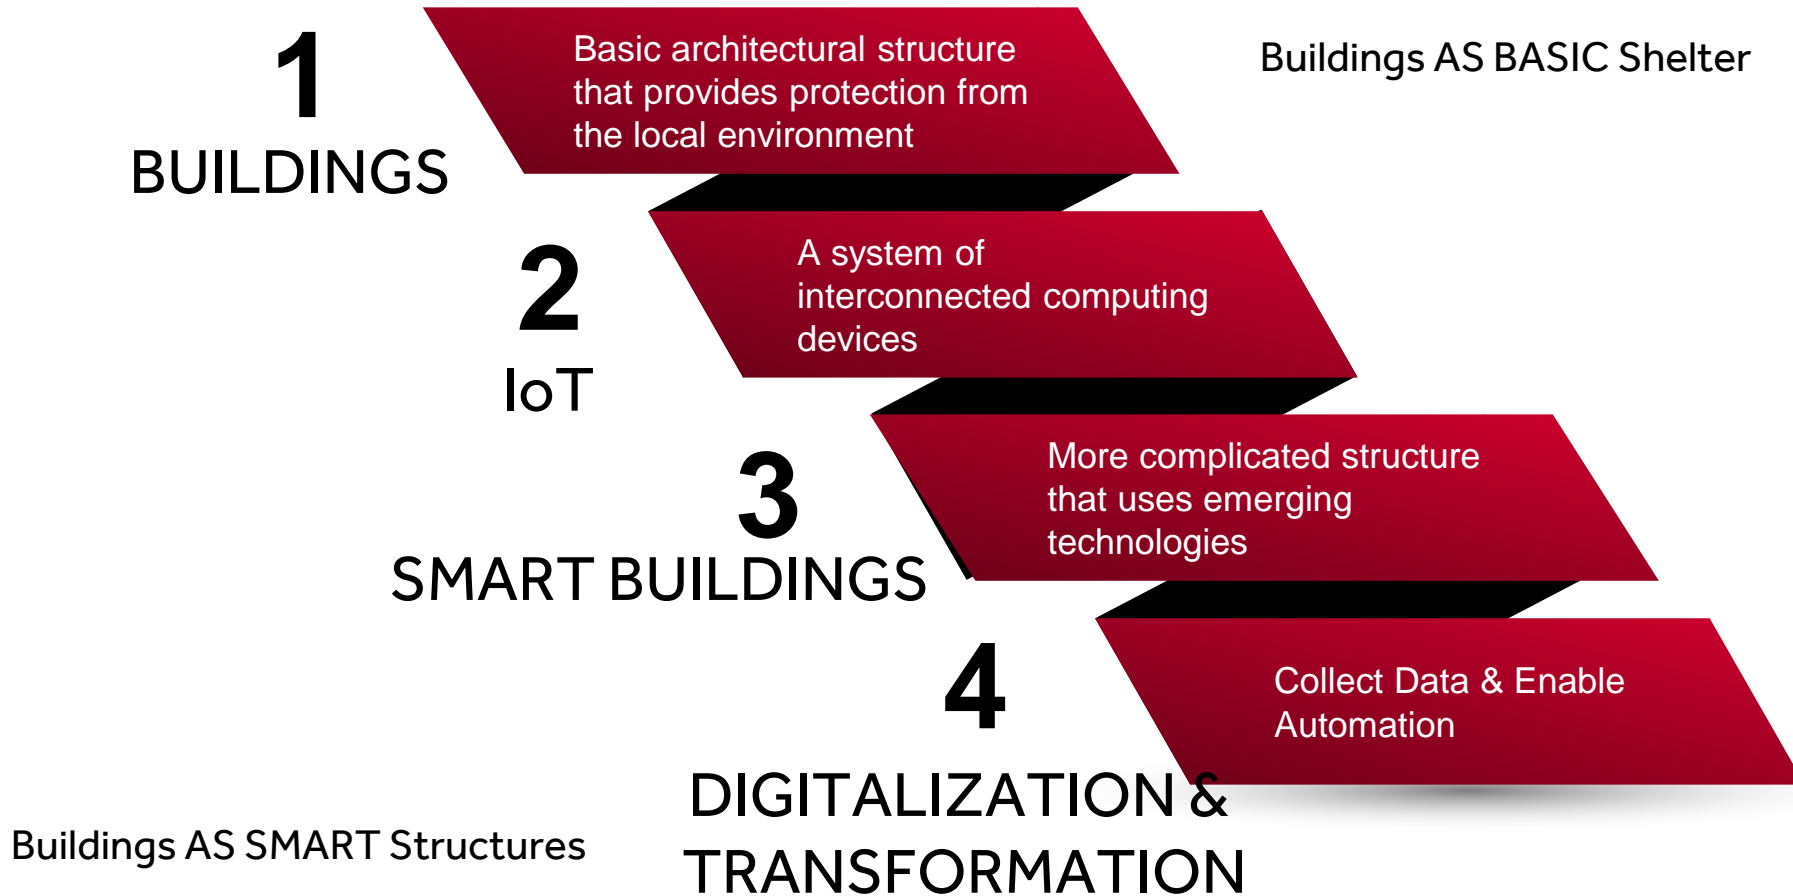

# PRESENTATION OUTLINE

- Background of the Study
- Smart Buildings & IoT
- Methodology
- Findings
- IoT Framework for Smart Buildings
- Conclusion

# BACKGROUND OF THE STUDY

# SMART BUILDINGS & IOT

- This investigation may potentially reveal additional prospective domains and lines of inquiry for technological advancement.
- Research Questions?

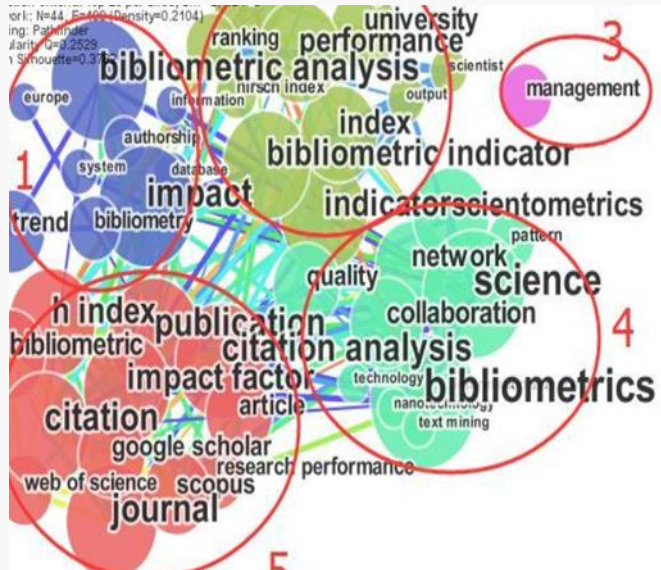

# SMART BUILDINGS & IOT

1. Which **stages** of IoT development in smart buildings are currently underway, according to the publication year?
2. Which IoT application **clusters** are there in smart buildings?
3. What is the Internet of Things **Framework** for Smart Buildings?

# METHODOLOGY

- BIBLIOMETRIC ANALYSIS**

- Bibliometric analysis is a method that includes statistical analysis of published articles and citations to measure their impact.
- Unveils pivotal articles & objectively illustrates linkages between and among articles about a certain research area.

# METHODOLOGY

## ABSTRACT

- Background
- Statement of problem
- Aim / Objective of the study
- Methodology/Results
- Conclusion/future research

## FUTURE AGENDA

- Fill the existing gaps through future research

## INTRODUCTION

- Existing knowledge on the Problem
- Limitations on the existing knowledge (Extension)
- Your research question (why the research?)
- 500 words for each aspect.

## DISCUSSION & CONCLUSION

- Mapping Existing Literature
- Highlight Limitations
- Identify gaps

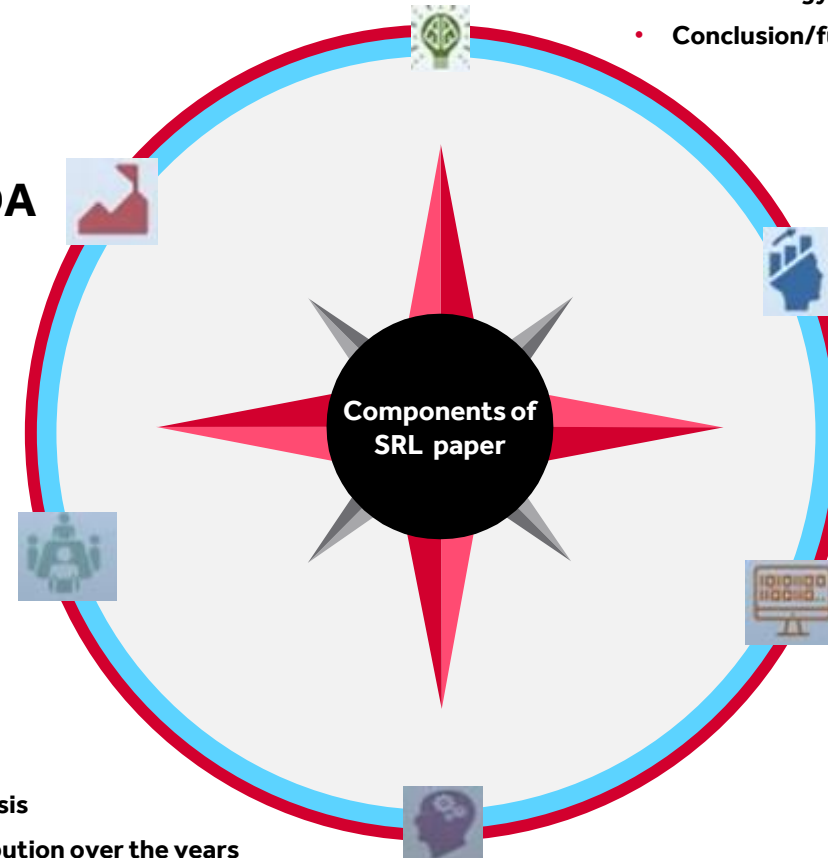

## METHODOLOGY

- Search Strategy
- Selection Criteria
- Quality Assessment
- Data Extraction

### Descriptive Analysis

- Records distribution over the years
- Country distribution
- Most cited records
- Most cited journals

## RESULTS & INTERPRETATIONS

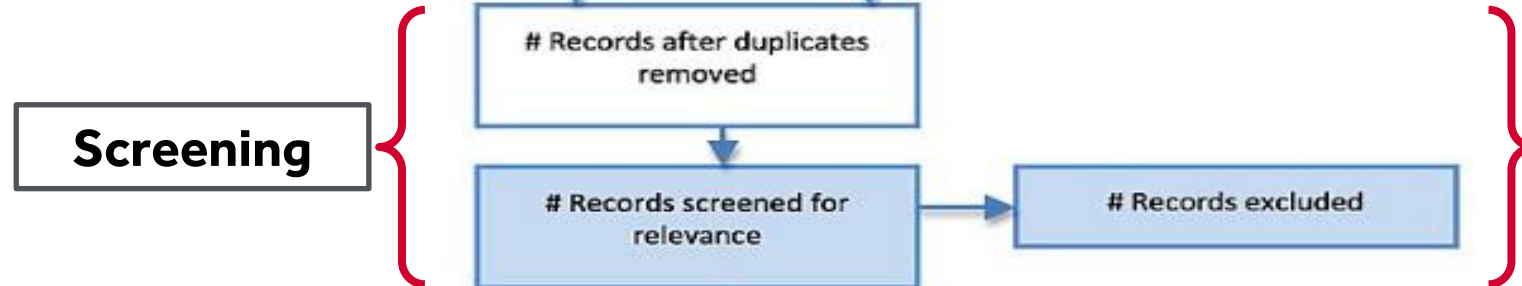

# METHODOLOGY

- Keywords
- Search Criteria & Database
- Records Extracted

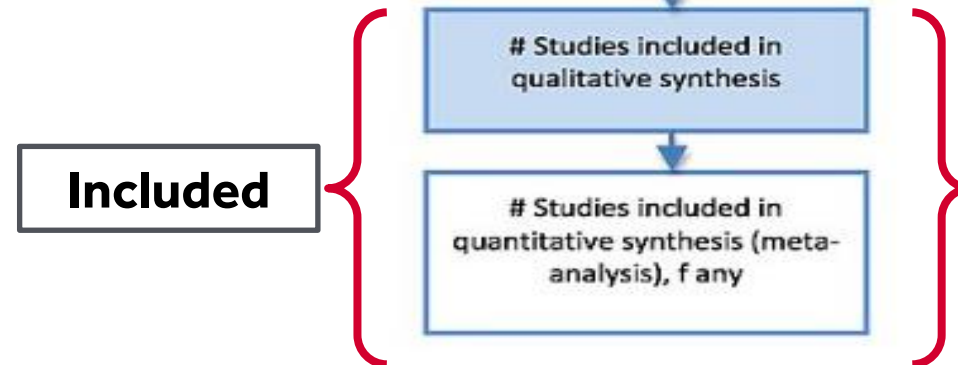

- Inclusion & Exclusion Criteria; article, years under consideration, countries, subject area, country, journal etc.

- Quality Assessment
- Scope irrelevant studies should be excluded; duplicates removed

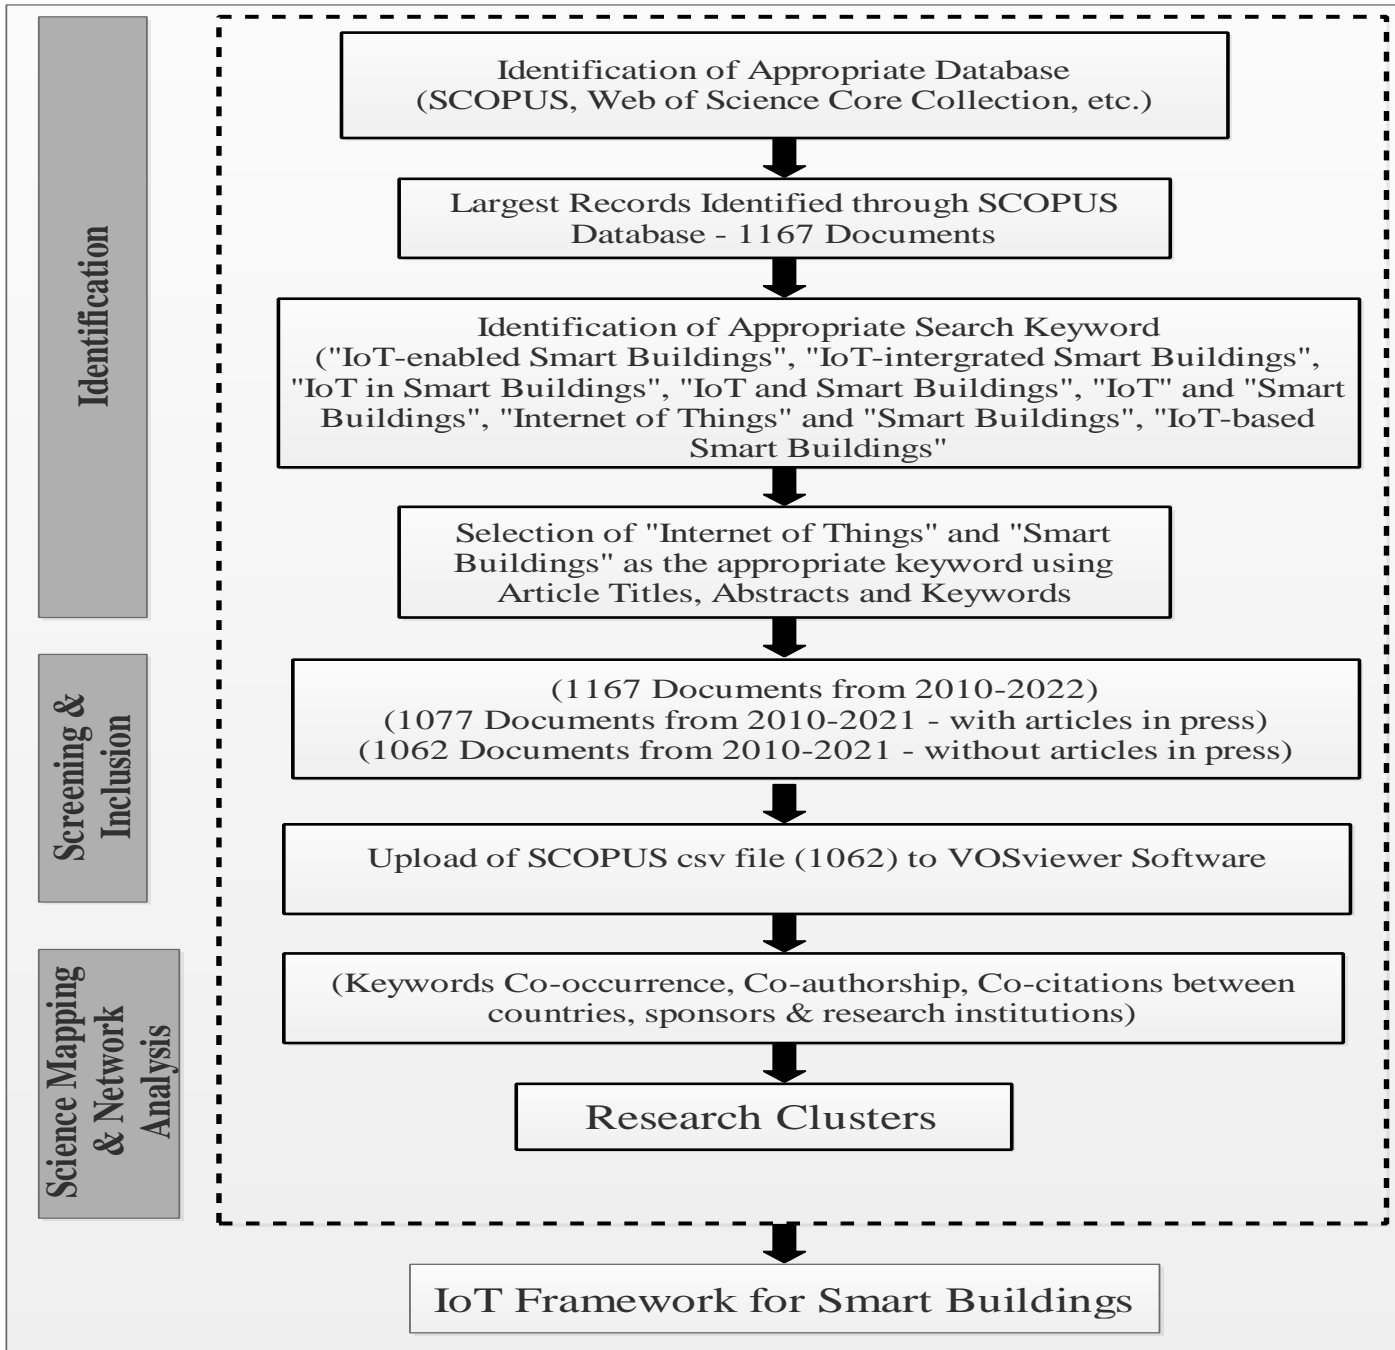

- Final number of articles to be included

Note: PRISMA – Preferred Reporting Items for Systematic Reviews and Meta Analysis

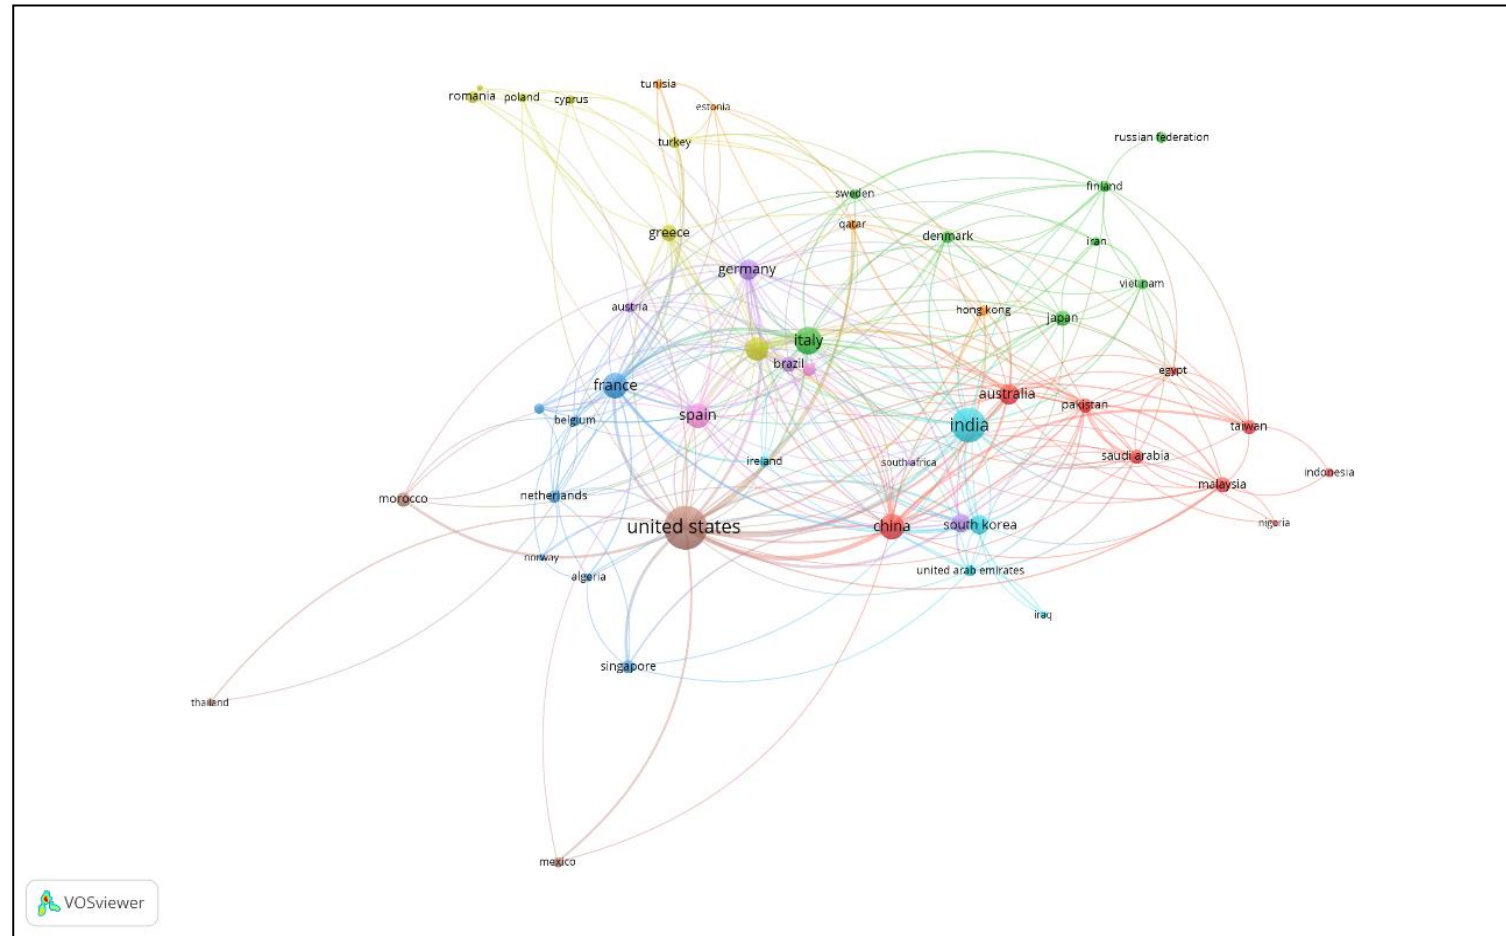

## BIBLIOMETRIC PROCEDURE

# FINDINGS

Literature sample and year of publication of IoT and smart buildings research

# FINDINGS

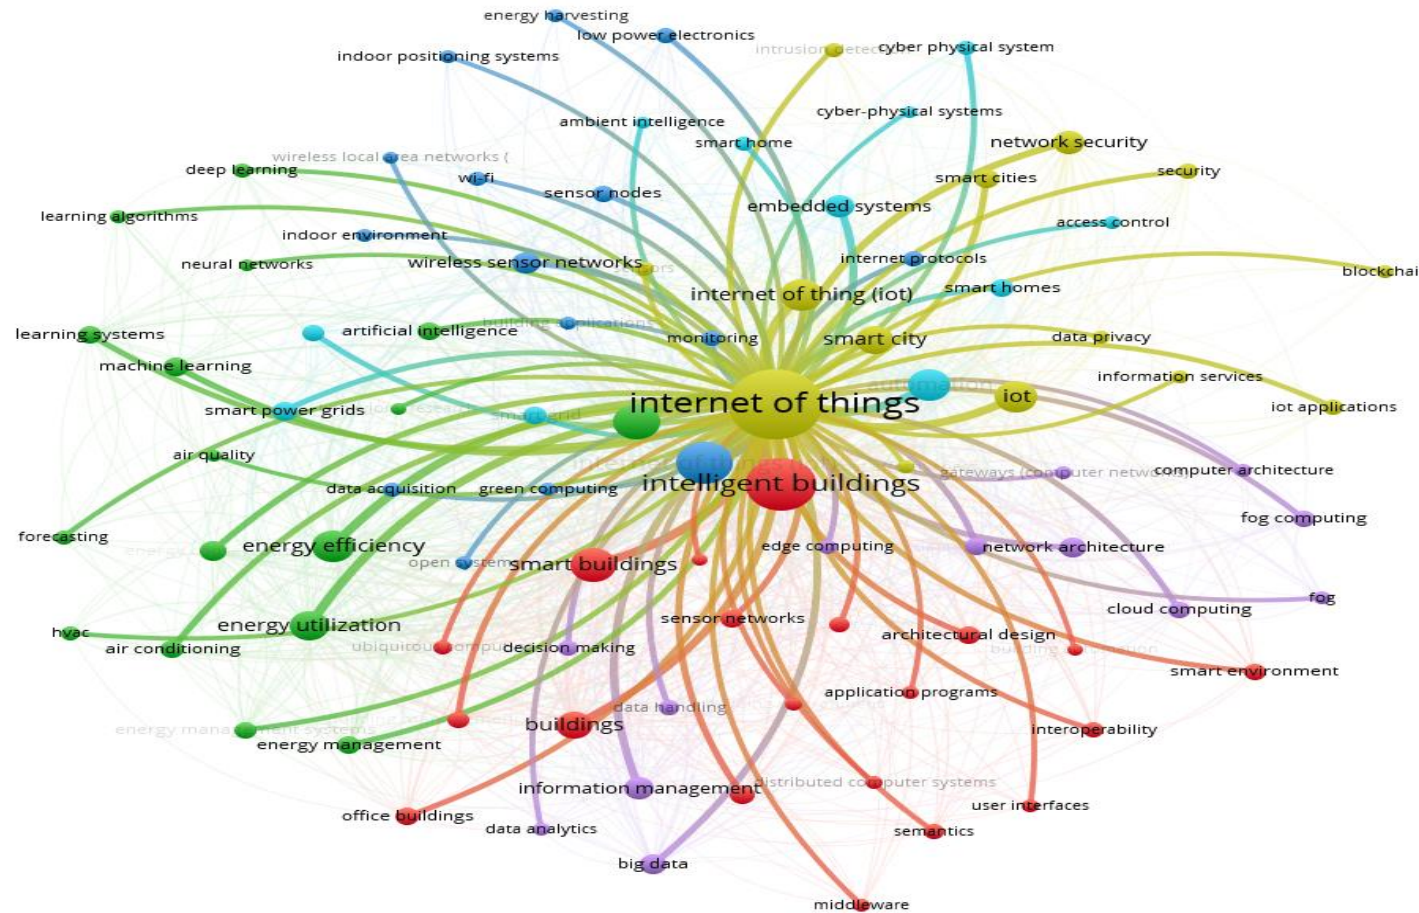

Relationships Between Countries

# FINDINGS

Major Keywords detected in IoT and Smart Buildings research

Cluster	Major Keyword	Theme	Phase
<sup>1</sup> Yellow	Internet of things	Internet of things & network security	Data Collection
<sup>2</sup> Purple	Network Architecture	Network Architecture & Cloud Computing	Data Transfer
<sup>3</sup> Red	Intelligent buildings	Intelligent buildings & Smart Environment	Data Analysis
<sup>4</sup> Green	Smart Building	Smart Buildings & Energy Efficiency	Data Visualization
<sup>5</sup> Blue	Automation	Automation & Embedded Systems	Automation & Control

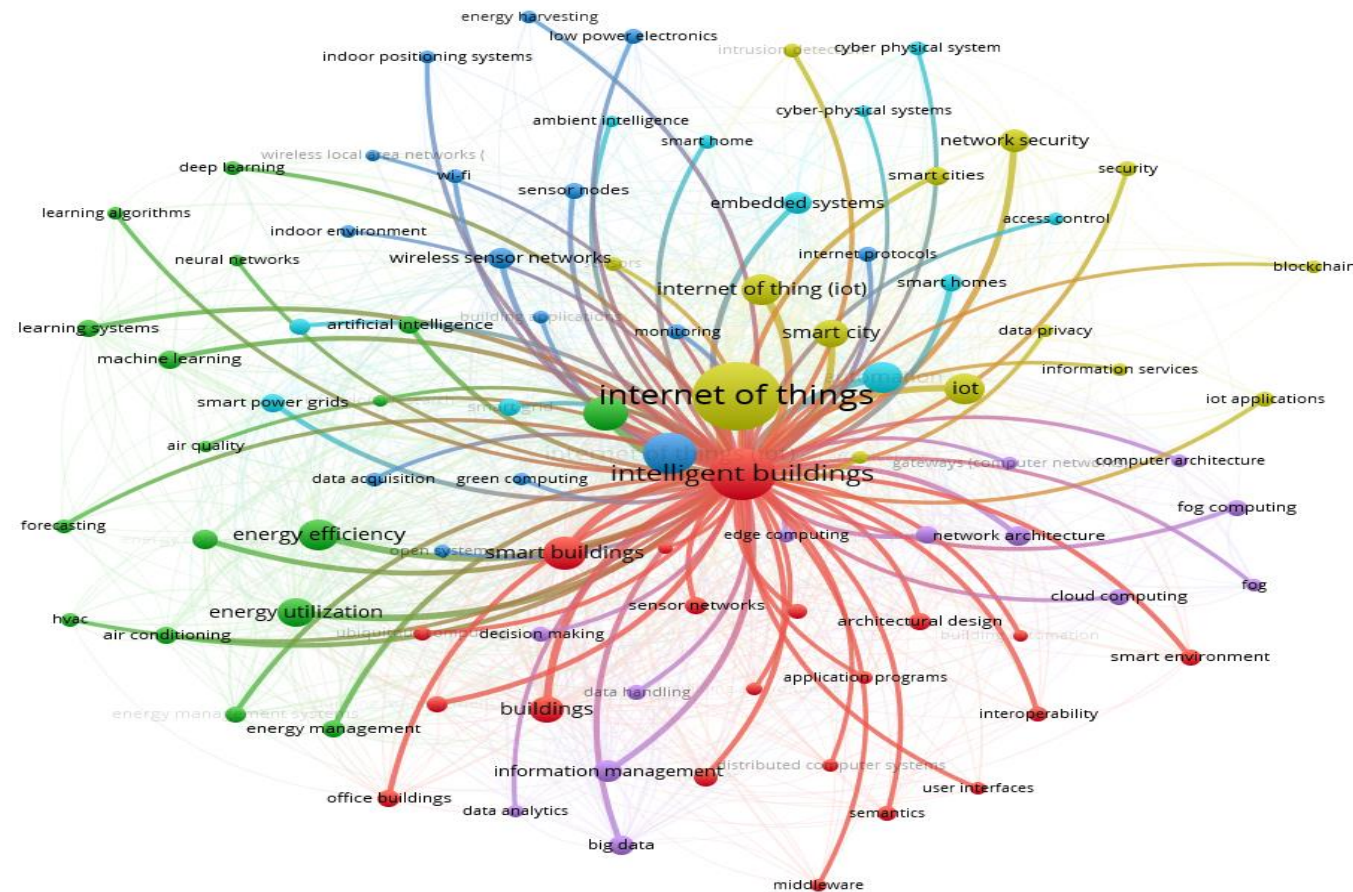

# FINDINGS

Cluster 1 - Internet of things & network security

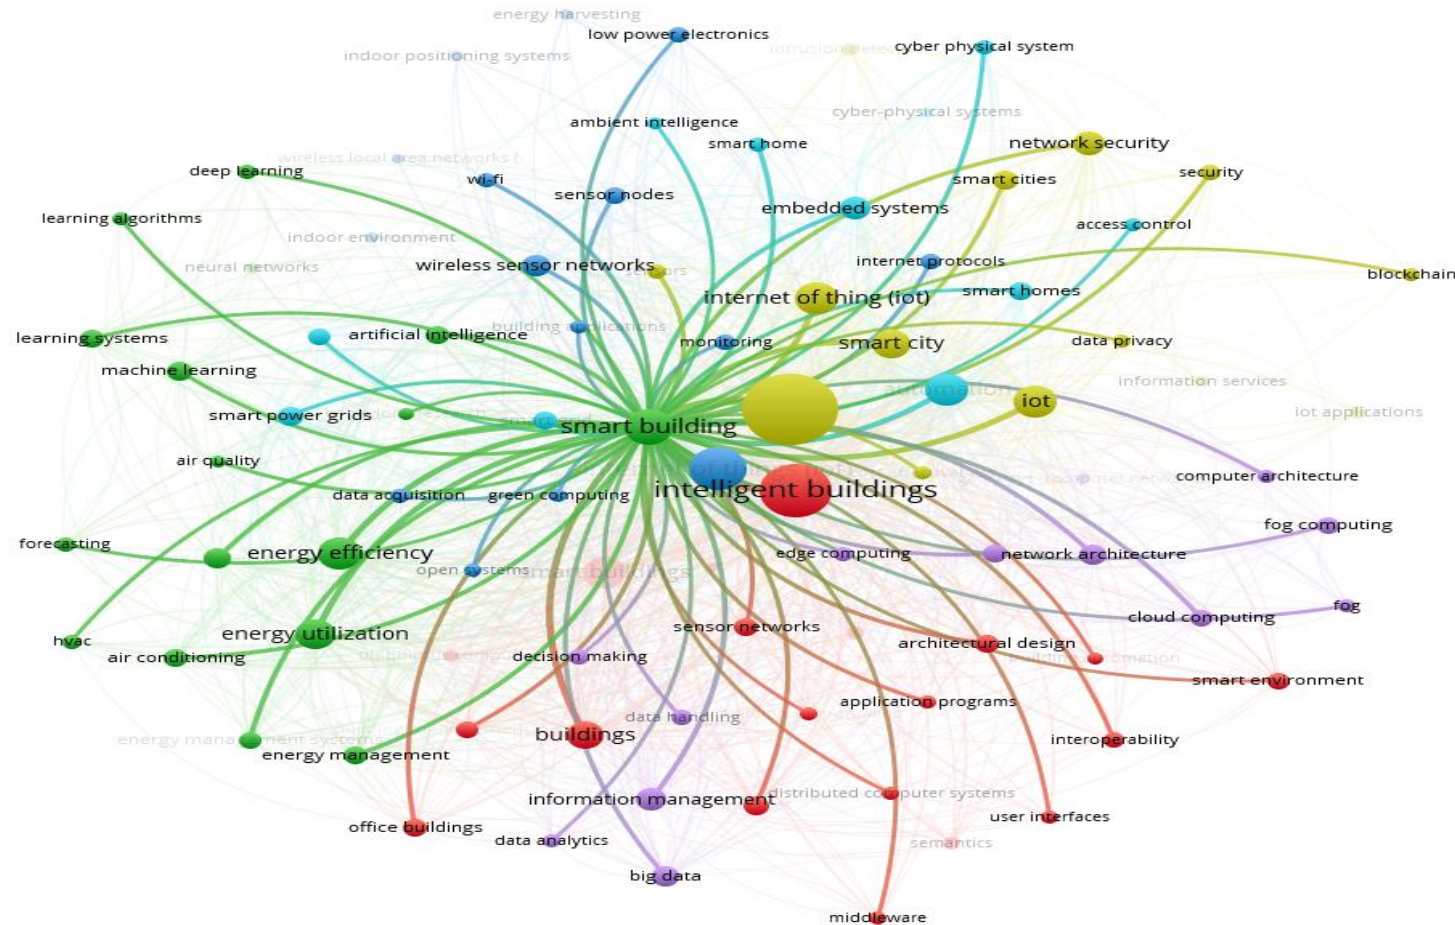

# FINDINGS

Custer 3 - Intelligent buildings & Smart Environment

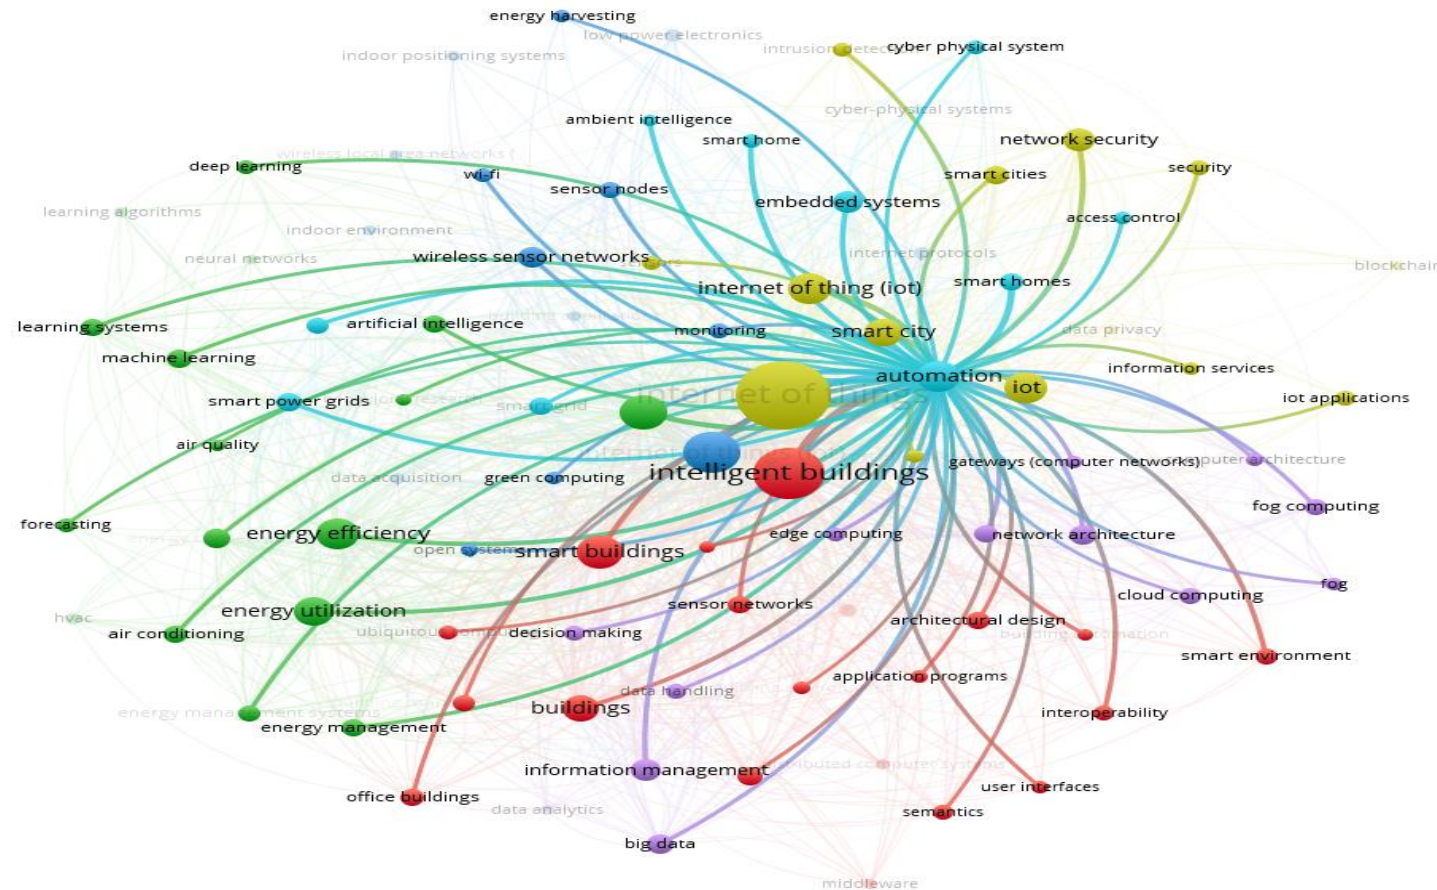

# FINDINGS

## Custer 4 - Smart Buildings & Energy Efficiency

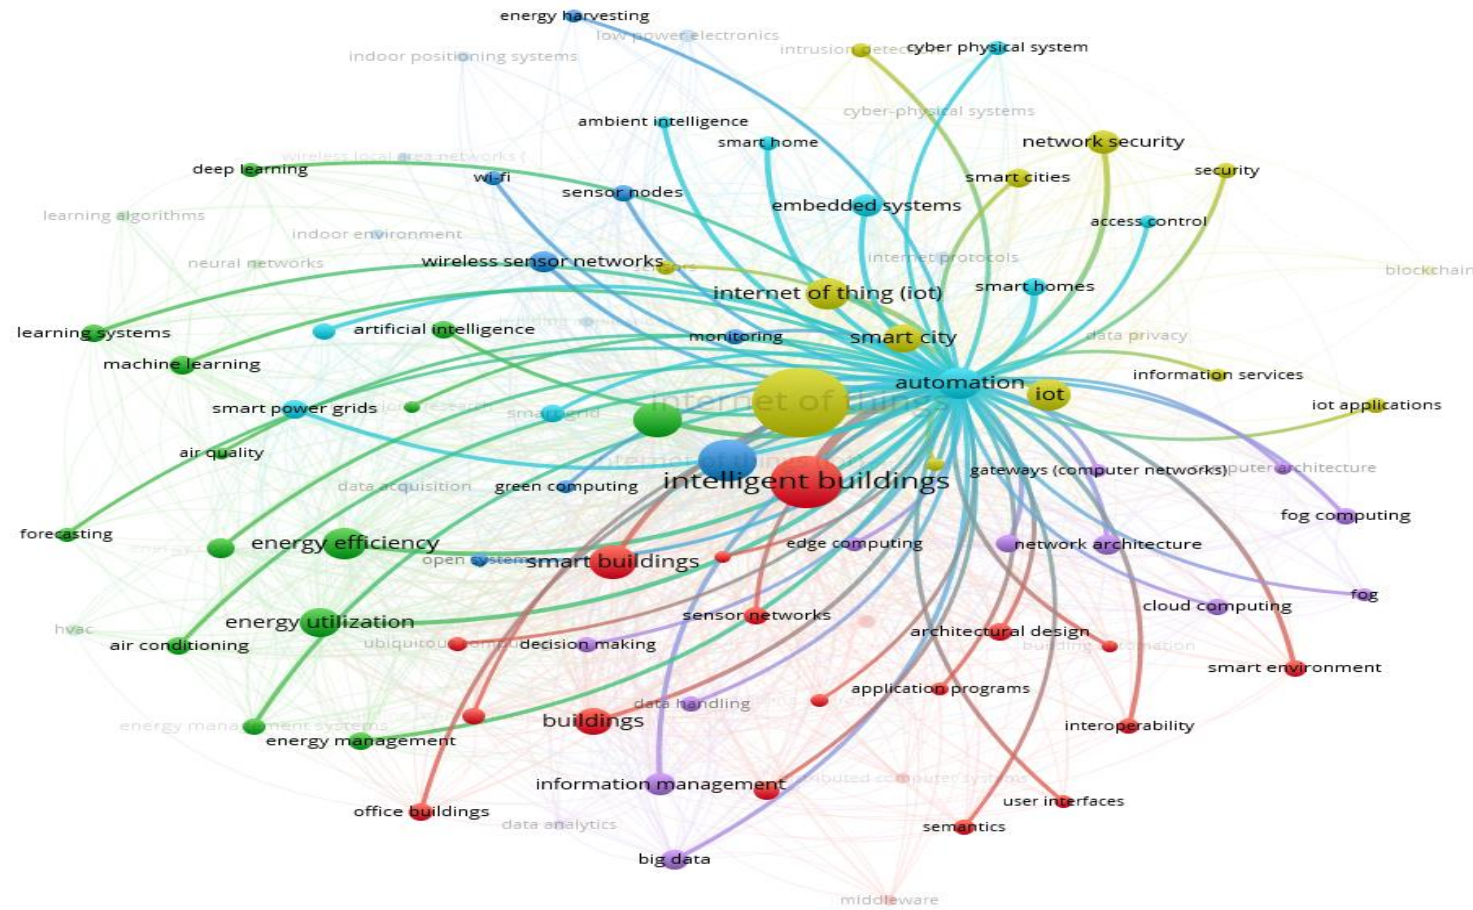

# FINDINGS

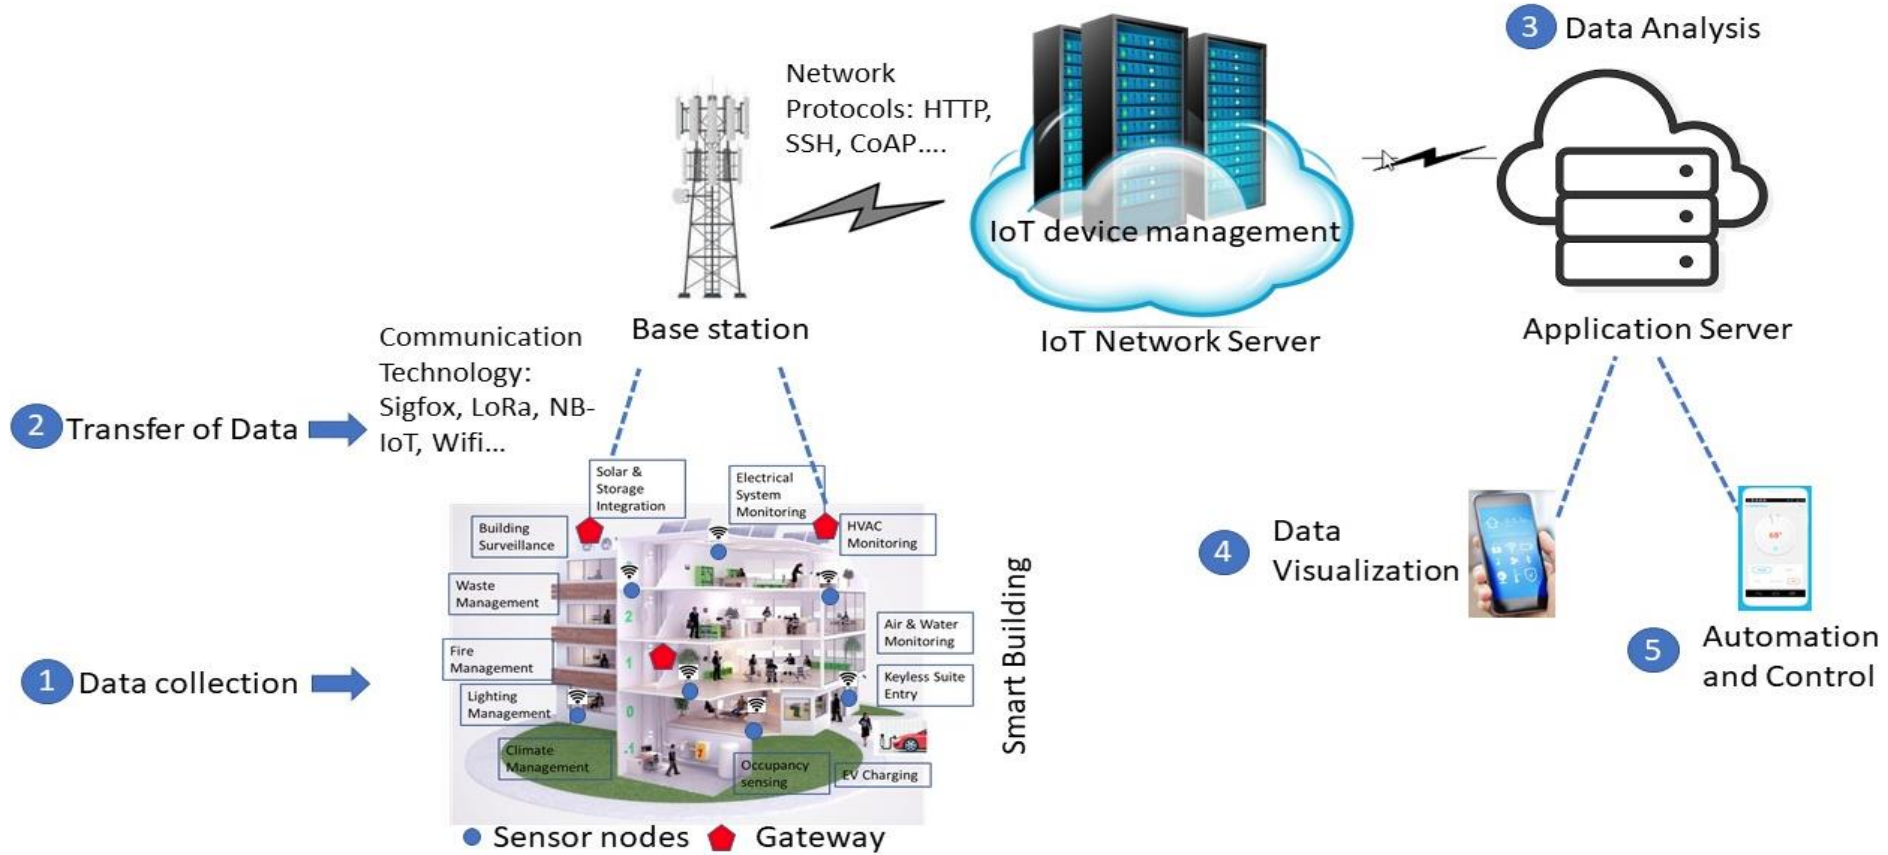

Custer 5 - Automation & Embedded Systems

# FINDINGS

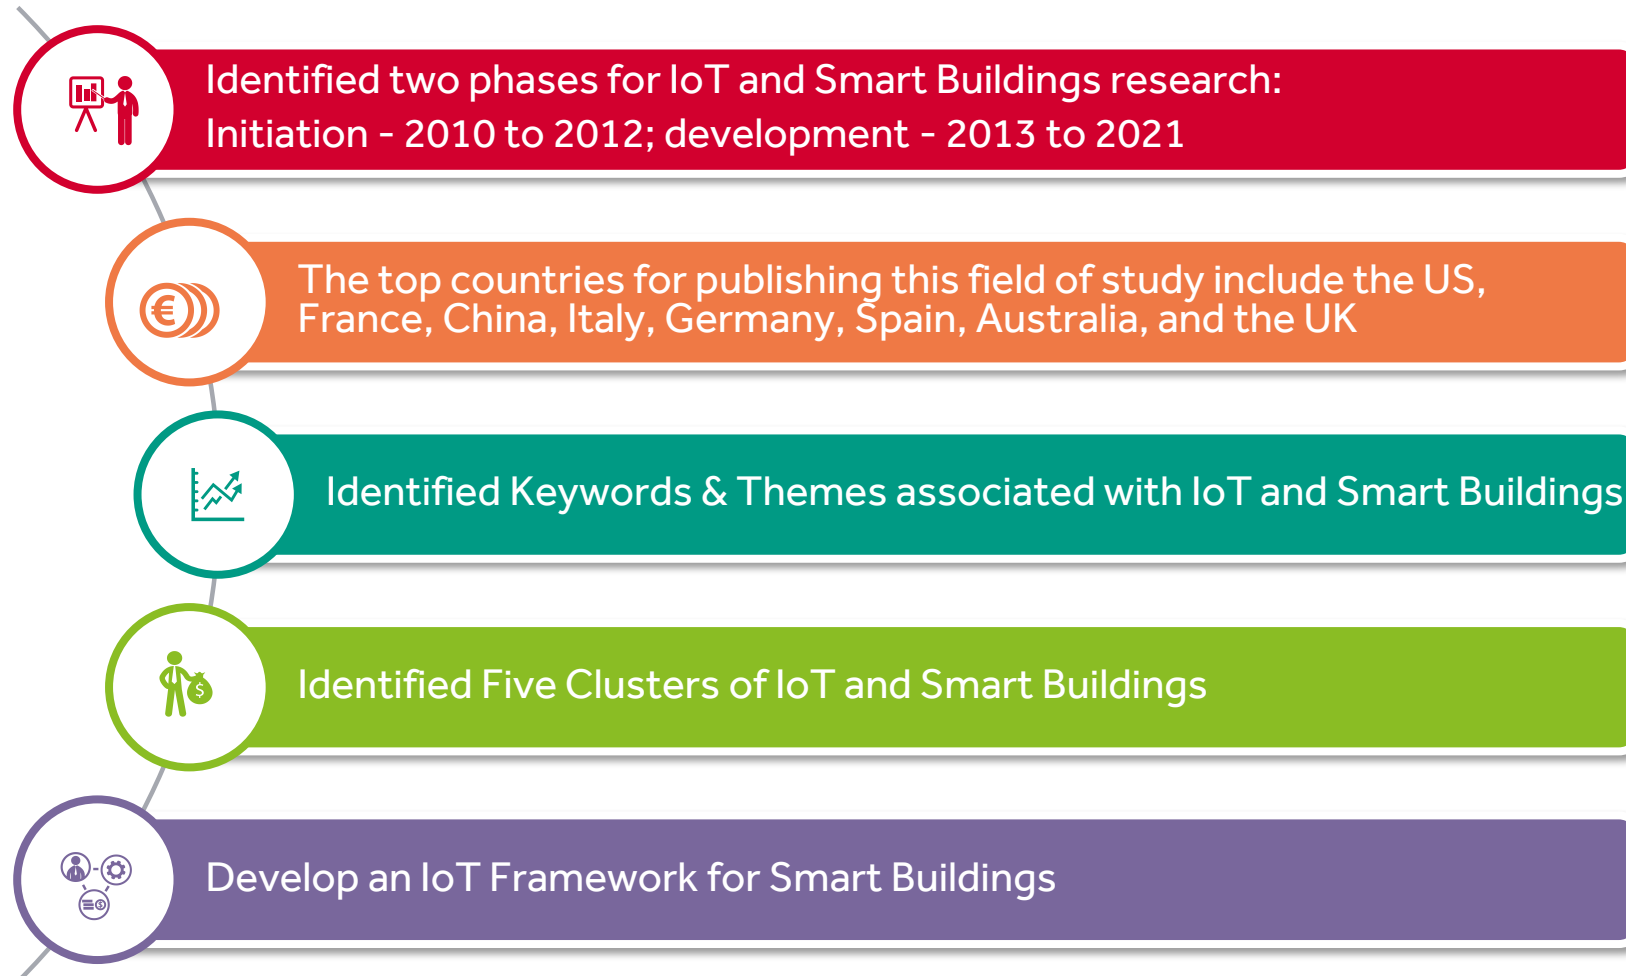

## Custer 5 - Automation & Embedded Systems

# FINDINGS

IoT Framework for Smart Buildings

# CONCLUSION

**THANK YOU !**
